

Gaia Resources is a Western Australian company with a national profile in delivering archival management systems solutions across Australia. It has recently delivered

solutions for the State Records Office of Western Australia, Queensland State Archives and Public Records Office of Victoria.

In our kick-off ASA WA Branch event for 2022, CEO Piers Higgs will discuss the work of the company in the archival collections management space, solution features and emerging technology that Gaia expects to play a role in future solutions building.

*Audience: This presentation is aimed at archivists and collection managers seeking to maintain knowledge and skill currency in archival management system building. It is also relevant to organizations contemplating acquiring a collection management information system.*
